The present tariff has vielded over twenty-six millions, or 25 per cent. more money than did the old one in the same The sneers and ridicule with which the "revenue" tariff was ushered into existence are still fresh in the memory of its friends, and they are content with the mortification which its enemies suffer on that score. But perhaps the most gratifying evidence of its soundness, as well as of the eminent ability with which its operation was regulated at first, is its absolute freedom from fraud, notwithstanding the rates of duty which it still permits on many descriptions of imports. The complete evidence of this freedom from fraud exists, independently of the fact of its yielding such large

Rementer and Caldwell had collected the scattered remains of the plundered mails, and taken them to their respective houses, from which they were subse-

quently removed to the Post Office. A single glance sufficed to show that the stolen pouches were some of the most important in the great Southern and South-western mails, which left this city on Saturday night, at half past 92 ten o'clock, for the South. Those known to be robbed are the pouches from New York city to Richmond, Va., Raleigh, N. C., and Wheeling, Virginia, the last containing the mails for Ohio, Indiana and Illinois, (except the Lake counties) Tennesee, Kentucky, Arkansas, Misson, 82 ri; and the Southwest generally. These generally contain large remittances of bank notes, as well as checks, drafts, &c. the cash being made up chiefly of Southern and Western funds, bought up by the brokers in the Atlantic cities, and sent home for redemption. Nothing 65 vet known calculated to lead even to a guess of the amount of money stolen but it must be very large.

Had the South engaged in the manufacture of cotton at the same time that the New England States did, we have no doubt the manufacturers, in the last mentioned quarter, would long ere this have been compelled to withdraw from the field of competition, or, at all events, confined themselves to the productions of the finer qualities of goods. It is within the recollection of us all, when the first cotton manufactory was established in the South, and even now, we have one quarter as many as in all the lished in the South, and even now, we have one quarter as many as in all the Eastern States. The progress of Southern manufactures has gone on with but little noise, but still steadily and rapidly.

Oh, I long to lie, dear mother, On the cool and fragrant grass, With nought but the sky above my head And the shadowing clouds that pass.

And I want the bright, bright sunshine All round about my bed : I'll close my eyes, and God will think Your little boy is dead!

Then Christ will send an Angel To take me up to him; He will bear me slow and steadily, Far through the ether dim.

He will gently, gently lay me Close to the Saviour's side, And when I'm sure that we're in heaven My eyes I'll open wide.

And I'll look among the Angels That stand about the Throne, Till I find my sister Mary, For I know that she is one.

And When I find her, mother, We will go away alone, And I will tell her how we've mourn All the while she has been gone.

Oh! I shall be delighted To hear her speak again-Though I know she'll ne'er return to us To ask her would be vain!

So I'll put my arms around her, And look into her eyes, And remember all I said to her, And all her sweet replies.

And then I'll ask the Angel To take me back to you-He'll bear me slow and steadily, Down through the ether blue.

And you'll only think, dear mother, I have been out at play, And have gone to sleep beneath a tree, This sultry summer day.
